AUDIO SYSTEM GERMANY

HISTORY

The story of **AUDIO SYSTEM** began 40 years ago.

I, Axel Förderer, started my first CAR and HIFI business and imported **AUDIO SYSTEM** amplifiers from Italy. I used my passion to create and establish my own loudspeakers and crossovers.

To this day, I and my technicians and engineers develop all products, circuits, programming, etc., partly with KLIPPEL. Starting with two product lines and one amplifier line, **AUDIO SYSTEM** now offers over 10 product lines, from the affordable **CARBON** series to the HIGH-END **AVALANCHE** series.

With a wide selection of batteries, power cables, RCA cables, accessories, empty enclosures, damping materials, power amplifiers (DSP, ANALOG + DIGITAL), loudspeakers, subwoofers, and over 750 PLUG & PLAY systems, **AUDIO SYSTEM** has developed into a leading full-service provider for all the requirements of the car hi-fi industry.
